EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: Cancel the claims withdrawn from consideration as a result of restriction requirements.

Claims 32-41: Cancel

Claim 45: Cancel.

Claim 52-53: Cancel.

2. The following is an examiner's statement of reasons for allowance: After careful study of the pending rejected claims, the previously applied references of Matsubara, Omoya and Bearinger and the applicant's analysis presented on page 8 and 9 of the response filed on September 8, 2006, the examiner concluded that the modified structure of Matsubara does not disclose the structure claimed by the applicant in the base claims 27 and 48. The previously applied rejections are therefore withdrawn. Claims 27-31 and 48-51 are allowed. To be specific: Regarding claims 27-31: The patentability resides in the limitations "a conductive structure forming an electric conduit between the conductive layer and at least one bonding pad, said anisotropic conductive adhesive being disposed at least partially surrounding the conductive structure for bonding the FPC to the at least one bonding pad, wherein the conductive structure

Art Unit: 2841

comprises a filling completely occupying a space formed by the at least one bonding pad, the conductive layer, and the at least two sections of the overcoat layer" in combination with other claimed limitations of the base claim 27, and

Regarding claims 48-51: The patentability resides in the limitations "a conductive element attached to a second portion of said second side of the conductive layer wherein the conductive element is adapted to form an electrical conduit between the conductive layer and the attached bonding pad, and the overcoat layer is to press against said bonding pad, wherein the conductive element comprises a filling that completely occupies a space formed by the bonding pad, the conductive layer, and the overcoat layer when the bonding device is attached to the bonding pad" in combination with other claimed limitations of the base claim 48.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
